Download Reports from MOIC

- Download reports implementation does not have a dependency on discussion with other teams.
- The file format is known including what fields need to be present in each report.
- There are 8 reports in total (downloadable).
 - File Name to have “Fashion Season” and “Channel” (values selected by user before downloading report)
- Dependency on actual data (sample data) for unit testing purpose.

Internal APIs (front end + back end)

- We have prepared the list of internal APIs needed for each screen.
- WIP – Config screen.
 - Account Master is the first priority as per Dale.

Upload data through excel into MOIC

- Upload data through excel implementation does have a dependency on discussion with other teams; however the generic development can start.
- The file format is known including what fields will be present in each upload excel.

DEPENDENCIES:

- VDI access with tools & software as requested
- ESB Team for Joor integration, PMDB Team for Product Master Data and SAP Team for Account Master Data
- Sample data set from external applications. Needed for field level mapping and MOIC schema finalization

BLOCKERS:

- No blockers as on date but conclusion with external teams is becoming critical.

MITIGATION:

- Use local environment for development.
- Testing in local against sample data.
