

Progress Check 6

MOIC Application Development

Prepared & Presented by

Name: Vatsal Thakkar

Email: vatsal.thakkar@cignex.com

Title: AVP – Delivery

Role: Program Management

1 Project Plan – Check Dates & achieved milestones

2 Development Progress

3 Dependencies / Blockers / Mitigation

4 Team Members for Onboarding

5 Q&A

Project Plan – Dates

Key Milestones	Planned Start	Planned End	Remarks	Deliverables
Project Kick Off	23-Nov-2020	23-Nov-2020	Project Kickoff	Kickoff PDF / PPT
Requirements Signoff / Design Signoff / Environment & Access setup	24-Nov-2020	11-Dec-2020	Conclude on all integrations through discussions with other teams (ESB / PMDB / A360 / ECV / Centric)	SRS HLD Execution Plan
Non Functional Screens (as per the mockups from BRD)	24-Nov-2020	11-Dec-2020	Design the screens of MOIC in Angular (this will be non functional screens)	Non Functional Screens
MOIC DB Design	24-Nov-2020	11-Dec-2020	Database schema and creation	DB scripts
Development & Unit Testing	14-Dec-2020	22-Jan-2021	Coding (MOIC functionalities)	Codebase of MOIC, Test Cases
Quality Assurance & Integration Testing	25-Jan-2021	12-Feb-2021	QA & Bug Fixing	QA signoff
Tapestry UAT	15-Feb-2021	19-Feb-2021	UAT and Handover to Tapestry	All relevant documents, MOIC final codebase
Hypercare Support	22-Feb-2021	5-Mar-2021	Hypercare support	Bug fixing and Training as required

MOIC Application

- Config Screen
 - Upload Customer Data (completed)
 - Download Customer Data (completed)
 - UI Integration with backend (completed)
 - In line updating and saving
 - Search

Demo

Internal APIs (development)

- MOQ Screen – 50% complete
- SKU Change Screen – 25% complete
- Overview Screen – 25% complete

Integrations (S4)

- Inbound approach final
- Outbound approach final
- Middleware: **ETL**
- Mapping sheet: Sent

Integrations (PMDB)

- Inbound approach final
- No Outbound
- Middleware: **ETL**
- Mapping sheet: WIP

Integrations (JOOR)

- Inbound approach TBD
- Outbound approach – being checked
- Middleware: **ESB**

DEPENDENCIES:

- VDI access
- Sample data set from external applications. Needed for field level mapping and MOIC schema finalization
- ESB Team connect (for Joor inbound and outbound of order data)
- Resource Availability – Soumen Sain
 - Personal emergency

BLOCKERS:

- VDI will become blocker since we will not be able push the interim deployments to Tapestry
- Sample Data sets (we need sample customer data, sales order data)

MITIGATION:

- Use local environment for development.
- Testing in local against sample data.

Team Members for Onboarding

Onboard:

- Vatsal Thakkar – PM
- Mehul Bhatt – UX / UI
- Tina Agarwal – BA
- Safee Mogal – Development
- Soumen Sain – Development
- Khem Chand – Development
- Shanti Chatri - QA

QUESTIONS:

- External team's SPOC
 - Joor – Mauro Marroncelli
 - SAP – Jagan Vuppala
 - PMDB – Ravinder Parmar
 - ESB – Ravinder Parmar
 - Infra Support – Mohan
 - ETL – Tarun Joshi
